Thank you for purchasing the MXL A-55 Kicker Bass Drum microphone. With proper care, this mic will provide many years of satisfaction. For best results, please take a few moments to review this literature.

General Characteristics

The MXL A-55 Kicker is a heavy duty dynamic microphone tuned specifically for kick drums and other low frequency applications such as bass guitar amps. The A-55 Kicker utilizes a cardioid pickup pattern to pinpoint the best sound while minimizing bleed from the rest of the drum kit.

Microphone Cables

The microphone cable can have a profound effect on the sound of any microphone. Even the finest microphones will sound poor if the interconnect cable allows noise to enter or causes distortion and loss of information. Use only the best microphone cable your budget will allow. We recommend using Mogami cable.

How To Use

Correct placement of your A-55 Kicker will be critical. We recommend you try different positions to find the best sound. We also recommend placing the A-55 Kicker close to your kick drum and pointing the head (capsule) directly at the sound hole.

Care

Dust and foreign material can degrade the performance of a microphone over time so always store the unit in its box. For vocals closer than 3-inches, use a "popper stopper" or windscreen to avoid getting moisture on the diaphragm as this can substantially degrade the microphone's performance.

A-55 Kicker Specs

Type:	Dynamic
Frequency Range:	30Hz - 15kHz
Polar Pattern:	Cardioid
Sensitivity:	-76 dB (+/-3dB @ 1kHz)
Impedance:	300 Ohms
Size:	60 x 130mm
Weight:	540g
Metal: Finish:	Black
