Thank you for purchasing the MXL FOX dynamic microphone 3-pack. With proper care, these mics will provide many years of satisfaction. For best results, please take a few moments to review this literature.

General Characteristics

This microphone is a super-cardioid dynamic microphone. It was designed primarily as a vocal microphone for on-stage use. The term "super-cardioid response" means that the FOX is most sensitive to sound arriving from the front, and less sensitive to sound from the rear and sides. Rugged construction and a steel mesh grill ensure the FOX will perform consistently in nearly all environments. The FOX features a standard 3-pin male XLR type connector. The microphone can be connected to the rest of your equipment using a standard microphone cable fitted with a female 3-pin type XLR connector.

Microphone Cables

The microphone cable can have a profound effect on the sound of any microphone. Even the finest microphones will sound poor if the interconnect cable allows noise to enter, or causes distortion and loss of information. Use only the best microphone cable your budget will allow.

Care

Dust and foreign materials can degrade the performance of a microphone over time so always store the unit in its case. Store the microphone in its original packaging or in the included zipper pouch.

Warranty

MXL Microphones are guaranteed against defects in material and workmanship for one year from date of purchase. Should you encounter any problem with this unit, promptly contact the company you purchased it from for assistance. The original dated sales receipt will be necessary for any warranty claim. Do not send any unit directly to us without prior authorization from our service department! Warranty coverage is limited to repair or replacement (at our option) of the microphone, and does not cover incidental damages due to use of this unit, nor damage caused by accidental misuse of this product.
